Communication / Public & Patient Engagement		Not applicable.									
Financial / resource implications		Not applicable.									
Significant Risks to Consider		No significant risks to consider.									
Outcome of Impact Assessments completed		None identified.									

Dr Charles Parker, Clinical Chair
NHS North Yorkshire CCG

Clinical Chair's Report

1.0 GP Practice Meetings

Over the last few weeks these meetings have recommenced. Some of the themes have been repeated around estates and the need for more space in primary care buildings as practices employ more staff through the additional roles money and pick up work supporting secondary care

2.0 Clinical and Professionals Group

I am now a member of this group which meets every Friday morning. It is a multidisciplinary and multi-service meeting allowing a wide range of professions and areas. It is good to be reminded that areas like Scunthorpe have as many issues with being isolated as Richmond. The plans for increasing Same Day Emergency Care are being developed across the ICS and are aimed at increasing the speed senior clinical review and discharge on the day of admission. This fits well with the work that is in place at the Friarage and Harrogate hospitals and is being developed at Scarborough.

3.0 Yorkshire and Humber Care Record

This is being developed at pace. It is being used in Lincolnshire and it is soon to be rolled out across Harrogate GP practices. It is in fact a virtual record and is created at the time of request from the "data consumer". The replies from the "data providers" is then assembled for view. This will be rolled out in waves to cover Harrogate practices first, once a Harrogate pilot practice has been selected. It will be visible by both primary and secondary care.

4.0 Clinical Executive

At the last meeting on 10 June 2021, the final historic clinical threshold was agreed. This has been a prolonged, very detailed task. This work was vital support the introduction of consistent clinical pathways consistently across the CCG and is the foundation for the Value Based Commissioning tool and Prior Approval Token to help control demand in secondary care. Thanks goes to the whole team that has worked on this, very ably chaired by Dr Chris Ives.

5.0 Recommendations

The Governing Body is asked to receive this report as assurance.

Dr Charles Parker, Clinical Chair
